TIPS FOR NAVIGATING THE COX CHANNEL GUIDE

Even with a clear understanding of categories, the guide can contain hundreds of channels. Here are some practical tips to streamline your experience.

Use the Favorites Feature

One of the most useful tools is the **Favorites** list. On your remote, you can add channels to a custom list. Once set, you can toggle the guide to show only your favorite channels, instantly reducing clutter. This is a simple yet powerful way to personalize the **Cox Channel Guide Las Vegas** for your household.

Search by Keyword

Instead of scrolling endlessly, use the search function. Whether on the Contour app or the on-screen guide, typing the name of a show, actor, or team will show you exactly when and where the content is airing. This feature also searches On Demand libraries, helping you find movies available for instant viewing.

Set Recordings in Advance

With a Cox DVR, you are not tied to the broadcast schedule. Use the guide to browse upcoming programs and press the **Record** button to save them. You can record single episodes or entire series. The DVR will automatically adjust for schedule changes, ensuring you never miss an episode of your favorite show.

Understand Your Package Tier

Not all channels are available in every package. The **Cox Channel Guide Las Vegas** will show all channels, but only those in your subscription will be viewable. If you see a channel that appears locked or requires a payment, it is likely part of a higher tier. You can upgrade your package online or by contacting Cox customer service.

ON DEMAND AND STREAMING INTEGRATION

Modern television is about more than live broadcasts. Cox has integrated On Demand content directly into the guide. When you browse for a show, you will often see options to watch it live or On Demand. This gives you immediate access to thousands of

movies and episodes without needing to set a recording.

Furthermore, the **Cox Channel Guide Las Vegas** works seamlessly with streaming apps. If you have a Cox Contour box, you can access popular streaming services like Netflix, YouTube, and Amazon Prime Video directly through the same interface. This convergence means you can search for content across both traditional cable and streaming platforms from one place, simplifying your entertainment experience.
